

SHELVING

AMCO II® WIRE SHELVING

ITEM # _____ MODEL # _____ QTY: _____
 PROJECT: _____
 OPTIONS: YES _____ NO _____

Standard Features & Benefits

- ◆ Unique square post design uses 27% more steel providing greater strength and durability than typical round post systems
- ◆ Shelves come in 5 widths and 8 lengths
- ◆ Shelves up to 48" long support up to 1,000 lbs. (450 kg)
- ◆ Assembly is fast and easy with a one-piece shelf installation adapter — a collet that can be slipped on the post at any height
- ◆ Posts are notched on 2" centers to assure perfect shelf alignment every time
- ◆ 17% taller collar provides more strength and greater rigidity
- ◆ Solid 2-1/8" robotic welds provide more stability than the two spot welds used on round post systems
- ◆ Shelf wire averages 50% thicker than other systems providing greater shelf capacity and strength
- ◆ Shelves have solid edges instead of truss edges making them easier to clean and label
- ◆ Use add-on unit to continue a straight line of shelving, for right angles or for back-to-back shelving
- ◆ Frame is 12 gauge solid steel
- ◆ Choose finish or color by adding appropriate suffix to model number (see chart to the left)

*Select a finish. Add suffix to model number.

| Finish | Suffix | Color | Suffix |
|------------------|--------|---------|--------|
| Plating Plus™ | CP | Black** | BK |
| Polygard® (Blue) | PG | White** | W |
| Stainless Steel | SS | Red** | R |

**Minimum quantity must be ordered for shelving with color finishes. Any combination of shelves and posts must equal 100. (For example, 40 posts and 60 shelves.)

SHELVING

AMCO II WIRE SHELVING

Specifications

SHELVES

Shelves are constructed of .162" gauge crosswires spaced 1-1/16" on centers with 5/16" (.3125") cross-braces. Cross braces are welded at each end of 9/16" x 1-1/4" x .090" leg. Square tapered 1-3/4" high steel collars are welded at each corner and a series of .262" rebrace wires are welded to the underside of the 18", 21" and 24" wide shelves in lengths of 54" and longer. All contact points are welded.

POSTS

Posts are constructed of .065" thick square tubes notched every 2" on each corner. A nylon cap is installed on the top and a nylon housing for a 3/8" – 16 x 1-1/4" steel leveler is notched on the bottom. The leveler has a 7/8" hex head and a 3/4" threadless shoulder to eliminate deposits of mop strands and broom fibers.

ASSEMBLY

Four nylon tapered collets are packed with each shelf. The collets can be installed onto any notched position on the post. The tapered shelf collars mate to the tapered nylon collet to securely seat the shelf onto the post. No additional tools are needed for assembly.

| Model No.* | W x L | | Weight | |
|-------------------------|-------------------------------------|------------|------------------|-------|
| | (In.) | (mm.) | (Lbs.) | (Kg.) |
| 12" Wide Shelves | | | | |
