# SPG can show you how to make fast work out of work in your dish area.

*SPG can customize our equipment in any material and to your unique size requirements. Contact us today for details.*

The dish area. It may be the least glamorous part of a restaurant. And, it usually gets the least amount of space. But, because of these physical limitations, and the physical demands of dishwashing, the need for efficiency is only that much greater. At the same time, any investment you make in this area should be one that pays off with long-term dividends.

So, efficiency and durability are essential components to any dish area solution. That's why they are also part of every SPG product. But these qualities are only the beginning. All of our dish area systems are fully customizable. And each brings you exclusive features, flexibility to accommodate your unique space and competitive pricing.

SPG also offers you everything you need: sinks, tables and floor troughs in a wide array of configurations. Plus, sink grids, soiled, clean and under-counter dish tables, mop and soap sinks, equipment stands, rack shelves, pot racks, dollies and more. All with exclusive advantages:

- Sinks, tables and dish tables are available in Standard Series 16 Gauge and Spec Line Series 14 Gauge stainless steel
- Sinks feature one to four compartments, with or without drainboards, have fully fabricated bowls that are welded, not drawn, for more strength and durability, and also feature cove corner construction for easier cleaning
- Our tables come in a variety of styles and sizes and offer a stronger, all-welded design that requires no assembly
- SPG tables have a square edge design for a clean abutment or are available in a selection of specialized edges
- Our attention to detail includes backsplashes that are 9" high and 2" thick to accommodate splash mounted hardware and align with adjacent work areas
